

Inther headquartered in the Netherlands, has logistics projects in Europe, US and Canada. Inther is a system integrator of logistics automation systems. To design a new internal logistics process or optimizing an existing one, we create a customized solution for each client. The central part of this solution represents the standard automation suite Inther LC.

Our projects, at mostly large international companies, cover all aspects: from the initial analyzing and specification to package customizing and software engineering. We also deal with: installation, putting into use and training on-site. As an employee at Inther you will be part of an enthusiastic team and will get the individual space for your own initiative.

Headquarters Netherlands

"Inther: Improve your intralogistics"

We are looking for a:

Software Engineer

As a software engineer you will be designing and developing new modules, improving existing modules meant for logistics automation. You will be using Java in combination with Oracle database.

We are looking for a software engineer to join our software team in Chisinau. Do you feel attracted to the variety of tasks mentioned above? Do you have following required skills?

- Java knowledge.
- SQL knowledge.
- Medium to advanced written and spoken English.
- Team-player.
- Good communication skills.
- A healthy state of mind with a remarkable dose of believing in yourself.

Note! Experience with other programming languages/concepts is an advantage.

We offer:

Competitive salary, opportunities to train and work abroad - Europe/US.

In order to apply for this position please send your CV to: isd@inthergroup.com
